### NOTABLE FEATURES:

F&J Model DFCP-ABM50-75L-30Li is a military grade lightweight, small footprint, AC/DC voltage powered air sampling system operable from (1) line power, (2) an on-board 30 Ah LiFe(PO<sub>4</sub>) battery, (3) an external 12-15 VDC power source, or (4) from the F&J LIBATBANK-12V external DC power source.

The DFCP-ABM50-75L-30Li is well suited for emergency response air sampling activities and where users do not know whether line power will be available. The unit may be operated from the on-board lithium ion battery, solar power, or a wind power source through either the AC input or DC input connectors.

The automatic flow control feature with the F&J Digital Flowmeter technology provides maximum flexibility for emergency response sampling responsibilities. The set flowrate is maintained automatically in case of dust loading and does not require operator attention. The air sampler is contained in a rugged, metal, small dimensioned enclosure which is water tight. The unit can be carried very easily by its metal handle.

Typical flow range is 10 - 75 SLPM (0.35 – 2.7 SCFM).

The air sampler is also equipped with internal data storage that allows the user to download the sampling data as a .csv file for easy data analysis.
